SUBJECT INDEX

Absorbent products for urinary incontinence, evaluation of, 28

Adolescents

behavioral correlates of health and illness in, 167
cardiovascular disease risks in males, 102

Advance directive planning for older persons, 93

African American elders, caregiving systems for, 108

Aging

and advance directive planning, 93
and CNS medications for homebound persons, 130
and family caregiving for African American elders, 108
and social support for rural elders, 61

AIDS

emotional distress in, compared to cancer patients, 209
and nurse caring behaviors for patients, 18
and wellness in homosexual men, 195

Arthritis, rheumatoid, suffering in, 177

Asthma, and behavioral correlates of health and illness in childhood, 167

Bipolar disorder, inpatient self-management of, 71

Blood pressure, mean arterial, in midtrimester preeclampsia, 161

Braden Scale for risk of pressure ulcers, 9

predictive validity of, 80
and scores related to skin breakdown, 184

Breastfeeding, and positioning intervention to minimize fatigue, 67

Cancer

emotional distress in, compared to HIV-infected patients, 209

and readability of patient education materials, 139

Cardiovascular disease. *See* Heart disease

Children

behavioral correlates of health and illness in, 167
disabilities in, and functional independence measures, 136
emesis volume assessment in infants, 2

Chronic illness

and health behavior in childhood, 167
and suffering in rheumatoid arthritis, 177

Clinical trials, and emotional well-being of participants, 53

Computer networks in nursing practice, 159

Coronary artery disease. *See* Heart disease

Diabetes mellitus

and behavioral correlates of health and illness in childhood, 167

and readability of patient education materials, 139

Disabled children, and functional independence measures, 136

Disadvantaged population

caregiving systems for African American elders, 108
knowledge of health care reform proposals, 144

Discharge from hospital, and effects of telephone follow-up, 47

Drug therapy

and emotional well-being of participants in clinical trials, 53
and use of CNS medications by homebound elders, 130

Editorials, 1, 45, 101, 159

Education materials

and preparatory information affecting stress in cardiac catheterization, 189
readability of, 139

Elderly persons. *See* Aging

Emesis volume assessment in infants, 2

Emotional distress in men with HIV infection, compared to cancer patients, 209

Emotional well-being of participants in clinical drug trials, 53

Falls, and risk assessment tool, 213

Fatigue during breastfeeding, positioning affecting, 67

Feminine hygiene practices, 123

Functional independence measures, pediatric, 136

Global research challenges, 101

Health care

and feminine hygiene practices, 123
and illness management behavior in childhood, 167
and readability of patient education materials, 139
reform proposals understood by disadvantaged persons, 144
and social support for rural elders, 61
and use of CNS medications by homebound elders, 138

Heart disease

and preparatory information affecting stress in cardiac catheterization, 189
and readability of patient education materials, 139
risk factors in adolescent males, 102
and self-care limitations after myocardial infarction, 24
and sleep patterns after coronary artery bypass surgery, 118

HIV infection

emotional distress in, compared to cancer patients, 209
and nurse caring behaviors for patients, 18
and wellness in homosexual men, 195

Homes of respondents, conducting research in, 37

Homosexual men with HIV infection, wellness in, 195

Humanistic behaviors and primary nursing practice, 33

Hypertension, and midtrimester mean arterial blood pressure in preeclampsia, 161

Incontinence, urinary, evaluation of absorbent products for, 28

Infants, emesis volume assessment in, 2

Leg ulcers, measuring of healing in, 204

Lupus erythematosus, adjustment of women to, 87

Menstruation, and feminine hygiene practices, 123
Myocardial infarction, self-care limitations after, 24

Nursing practice
and advance directive planning for older persons, 93
caring behaviors for persons with HIV infection, 18
computer networks in, 159
emesis volume assessment in infants, 2
and evaluation of skin breakdown prevention, 184
humanistic behaviors in primary practice, 33
intervention to enhance breastfeeding, 67
new perspectives in, 1
and practice-based research, 45
prevention of pressure ulcers, 9
in telephone follow-up of discharged patients, 47
and working-out caregiving systems, 108

Parenting, and maternal experience in women older than 35, 148
Poster etiquette, 97
Preeclampsia, midtrimester mean arterial blood pressure in, 161
Pregnancy
and midtrimester mean arterial blood pressure in preeclampsia, 161
and readability of patient education materials, 139
Preoperative Self-Efficacy Scale, assessment of, 40
Pressure ulcers, prediction and prevention of, 9
and scores related to skin breakdown, 184
and validity of Braden Scale, 80
Primary nursing practice, humanistic behaviors in, 33
Psychiatric problems, and inpatient self-management of bipolar disorder, 71
Psychosocial adjustment
and wellness in homosexual men with HIV infection, 195
of women with lupus erythematosus, 87

Readability of patient education materials, 139
Research
adjustment of women with lupus erythematosus, 87
assessment of Preoperative Self-Efficacy Scale, 40
evaluation of absorbent products for urinary incontinence, 29
fall risk assessment tool, 213
global challenges in, 101
in homes of respondents, 37
humanistic behaviors and primary nursing, 933
maternal experience in women older than 35, 148
member responsibilities on research committee, 154
new perspectives, 1
pediatric functional independence measures, 136
and poster etiquette, 97
practice-based, 45
predictive validity of Braden Scale, 9, 80, 184
readability of patient education materials, 139

successful long-distance collaboration, 219
Rheumatoid arthritis, suffering in, 177
Risk factors
for cardiovascular disease in adolescent males, 102
for falls, assessment of, 213
in prediction of pressure ulcers, 9
and validity of Braden Scale, 80, 184

Self-care
and behavioral correlates of health and illness in childhood, 167
inpatient management of bipolar disorder, 71
limitations after acute myocardial infarction, 24
and pediatric functional independence measures, 136
and readability of patient education materials, 139
Self-efficacy scale, preoperative, assessment of, 40
Skin care
evaluation of strategies for breakdown prevention, 184
prevention of pressure ulcers in, 9
and predictive value of Braden Scale, 80
Sleep patterns after coronary artery surgery, 118
Social support
and physical health of rural elders, 61
and wellness in homosexual men with HIV infection, 195
Stress
in cardiac catheterization, preparatory information affecting, 189
in men with HIV infection, compared to cancer patients, 209
Supportive measures
and physical health of rural elders, 61
and wellness in homosexual men with HIV infection, 195
Surgery
and readability of patient education materials, 139
and sleep patterns after coronary artery bypass, 118

Telephone follow-up after hospital discharge, 47

Ulcers
leg, measuring of healing in, 204
pressure, prediction and prevention of, 9
and predictive validity of Braden Scale, 80, 184
Urinary incontinence, evaluation of absorbent products for, 28

Vomiting, volume assessment in infants, 2

Wellness
and behavioral correlates of health and illness in childhood, 167
in homosexual men with HIV infection, 195
and social support for rural elders, 61
Working-out caregiving systems, 108
